

JUNE EXAMINATION

PROGRAMME : HUMAN MOVEMENT STUDIES

MODULE NAME : SPORT FINANCE

MODULE CODE : MBK3C02

DATE : JUNE 2014

DURATION : 1 ½ HOURS

TOTAL MARKS : 75 MARKS

EXAMINERS : MRS R VAN GAALEN AND MRS J BOLTON

MODERATOR : MR K THOMAS

NUMBER OF PAGES : THIS PAPER CONSISTS OF THIRTEEN (13) PAGES

INSTRUCTIONS TO CANDIDATES:

MAKE SURE THAT YOU HAVE THE COMPLETE PAPER.

ANSWER ALL THE QUESTIONS.

QUESTION 1

[20 marks]

REQUIRED:

Answer the following questions by choosing the correct answer. Write the **letter** you have chosen as your answer next to the question number.

1.1 The current Minister of Finance of South Africa is:

- A. Trevor Manuel
- B. Tito Mbowni
- C. Pravin Gordhan
- D. Gill Marcus

(2)

1.2 Determine which of the following statements are **CORRECT?**

- (i) In Financial Accounting, information is generally expressed in monetary terms, whereas in Financial Management the focus is *also* on non-monetary information.
- (ii) Companies are not legally obliged to prepare Financial Management accounts.
- (iii) Financial Management ignores the concept of risk.
- (iv) Financial Management is aimed at the future, whereas Financial Accounting focuses on the past.

- A. Statements (i) and (iii) are correct
- B. Statements (i), (ii) and (iv) are correct
- C. Statements (ii), (iii) and (iv) are correct
- D. All the statements are correct

A

(2)

1.3 Identify which one of the following entities is likely to encounter the highest agency cost.

- A. Small local operation
- B. Partnership between brothers
- C. Medium sized Government department
- D. Large public listed company

L

(2)

1.4 Identify which one of the following is NOT an internal stakeholder of the Tornados rugby union.

- A The Tornados management team
- B The players union consisting of Tornados rugby players
- C The suppliers of Tornados
- D The employees of Tornados

(2)

1.5 Identify which **ONE** of the following is relevant for a decision by Wimbledon Greens to convert 3 unused tennis courts into a bowling green.

- A The cost of a feasibility survey performed last year
- B The fixed monthly salary of the gardener of the club that will maintain the tennis courts and bowling green
- C The cost of a new lawn mower that will be purchased especially for the bowling green
- D The original cost of the land on which the tennis courts and bowling green is located

(2)

1.6 Timber Toys manufacture miniature cricket bats for various sport stores. Timber estimated the following average cost per bat:

| | |
|-------------------------|--------|
| Direct materials | R 8.65 |
| Direct labour | R 1.10 |
| Manufacturing overheads | R 0.95 |

Prime cost per unit is:

- A R 8.65
- B R 9.75
- C R 2.05
- D R 9.60

(2)

1.7 Which of the following are manufacturing overheads of Bags-Creations Ltd? Bag-Creations manufacture punching bags for boxers to practice on.

- A Fifty metres of leather material
- B One hundred metal zips that are twenty-five cm long
- C Payment to seamstress of R5 per completed bag
- D Monthly insurance paid on the imported sewing machines

(2)

1.8 Cost volume profit is:

- A used to determine how changes in costs and volume affect a company's operating income and net income
- B a systematic method of examining the relationship between changes in activity and changes in total sales revenue, expenses and net profit in the short term
- C Used to establish what will happen to financial results if a specified level of activity or volume fluctuates
- D All of the above

(2)

1.9 Which of the following is TRUE of a budget?

- A Detailed plans of various activities within a company that is coordinated by the preparation of plans of action for future periods
- B They are developed by examining business successes and failures
- C They show what resources are needed and where revenue shortfalls may occur
- D All of the above

(2)

1.10 Which of the following is TRUE regarding the advantages of using net present value (NPV)?

- A Target is subjectively set
- B It takes time value of money into account
- C Easy to use
- D All of the above

(2)

QUESTION 2

[14 marks]

Gorilla Boys Sports Supplements are investigating whether to include a new protein supplement, P-power, for ladies. They plan to sell the P-power for R135 per tub and hope to sell at least 1 500 tubs over the year.

The cost per tub has been estimated as follows:

| | |
|------------------------|-----|
| – Materials | R25 |
| – Manufacturing labour | R10 |

Salaries are expected to be R 65 000 per month, rental for the warehouse will be R20 000 per month and other administrative expenses will be R25 300 per month. Materials and manufacturing labour is considered to vary with each product produced and the other costs are all fixed.

REQUIRED:

- 2.1 Calculate the contribution margin ratio? (4)
- 2.2 Determine how many tubs of P-power must be sold to earn a profit of R50 000? (4)
- 2.3 Determine how many tubs of P-power must be sold to break-even? (2)
- 2.4 If Gorilla Boys decides to introduce the new product, they plan to advertise it with a big marketing campaign that has an estimated cost of R80 000:
 - i. Determine the new break-even point (Rand amount) for this new level of sales? (2)
 - ii. Explain what this means for Gorilla Boys? (Discuss your recommendation to Gorilla Boys). (2)

QUESTION 3

[11 marks]

All Stars is a soccer team that participate in the local soccer league. The team has recently appointed a new coach. Since the appointment of the new coach, the team has shown a tremendous improvement and has qualified to participate in the international premier league special tournament two years from now.

The coach has signed a 4 year contract with no exit clause and will receive a fixed monthly salary of R85 000 per month for the next 4 years (48 months).

The cost to participate in the special tournament (in two years' time) has been estimated as follows:

| | |
|--------------------|----------|
| Air tickets | R800 000 |
| Accommodation | R400 000 |
| Kit and other gear | R220 000 |

All Stars has also received various sponsorships to contract 2 top rated players before the special tournament. The top players have been identified and negotiations have started. The sponsorships amounted to R950 000 in total today.

One of the players has negotiated a special rate with NetCapital Bank who agreed that all investments that the team make with the bank will earn interest at 9% p.a compounded annually.

REQUIRED:

- 3.1 Determine the amount that All Stars should invest today to be able to pay the monthly salary of the coach for the next 4 years. Use the applicable formula. **(4)**
- 3.2 If NetCapital decreased the percentage interest earned on the money invested by All Stars, discuss the effect that it will have on the amount of money invested by All Stars today. **(1)**
- 3.3 Calculate the amount of money that must be invested today in order to save enough money for the team to travel to the special tournament after two years.
(Use the applicable table) **(3)**
- 3.4 Determine the amount that All Stars will have available to offer the top rated players if the money is received from the sponsors. Use the applicable formula. **(3)**

QUESTION 4

[15 marks]

Armour Apparel is a company that produces sportswear. The clothing ranges vary between summer or winter apparel.

The budgeted sales are then set out accordingly for the next year as follows:

First half: October to March R1 533 400

Second half: April to September R1 415 350

Additional information

- All sales are on account, but two thirds of all sales are collected in the half in which they occur and the remaining one third in the next half.
- All purchases of material are on a cash basis, and are estimated at being R370000 in the first half of the year and R535 000 in the second half of the year.
- Direct labour costs and factory overheads of R770 000 are also paid during the second half of the year.
- Selling and administrative costs amount to R500 000 per semester (half a year).
- The company has entered into an agreement with Truce Bank to obtain financing so that in all circumstances there would be a minimum cash balance of R10 000.

At the beginning of the first quarter the company had the following balances in its books:

- Cash R10 000
- Sales debtors R250 000

REQUIRED:

- 4.1 You are required to prepare a cash budget for the four quarters that end on 30 September together with a schedule indicating the cash collections. **(9)**
- 4.2 Budgets can be very useful for managing finances of a business. List one advantage and one disadvantage of budgets. **(2)**
- 4.3 There are three budget processes. Identify and briefly explain two of these three processes. **(4)**

QUESTION 5

[15 marks]

The McKenna Cricket Oval has been a popular place to watch cricket games. Their luxury suites have been well-used and are constantly full. The average price to build one of these luxury suites was R3 000 000, 5 years ago. The luxury suites now cost R4 500 000 to build.

Due to the success of these luxury suites the management at McKenna must decide whether it wants to spend R4 500 000 each to construct 2 new luxury suites. They believe each suite will last for 3 years after which they will need to be revamped and upgraded. It is estimated that each luxury suite will be rented out and bring in the following income annually:

| Year | Rental income |
|------|---------------|
| 1 | R1 420 000 |
| 2 | R1 600 000 |
| 3 | R1 850 000 |

- McKenna has an estimated a cost of capital (discount rate) of 8 %. They have a target accounting rate of return (ARR) of 25%.
- They have a payback target of 2 years.

Before making a decision, the management must decide whether this project will be beneficial or not.

REQUIRED:

- 5.1 Calculate the accounting rate of return (ARR) for the new luxury suites. **(5)**
- 5.2 Calculate the payback period for the new luxury suites. **(4)**
- 5.3 Calculate the value of building the new suites using the net present value (NPV), and provide a recommendation to management regarding their decision. **(6)**

TOTAL = 75

Formulae and Appendices / Formules en Bylae

2014

Time Value of Money Formulae

$$FV_n = PV_0(1+i)^n$$

$$FV_n = PV_0 \times FVIF_{i,n}$$

$$PV_0 = FV_n(1+i)^{-n}$$

$$PV_0 = FV_n \times PVIF_{i,n}$$

$$FVA = PMT \left[\frac{(1+i)^n - 1}{i} \right]$$

$$FVA = PMT \times FVIFA_{i,n}$$

$$PVA = PMT \left[\frac{1 - (1+i)^{-n}}{i} \right]$$

$$PVA = PMT \times PVIFA_{i,n}$$

$$FVAD = PMT \left[\frac{(1+i)^n - 1}{i} \right] (1+i)$$

$$FVA = PMT \times FVIFA_{i,n} \times (1+i)$$

$$PVAD = PMT \left[\frac{1 - (1+i)^{-n}}{i} \right] (1+i)$$

$$PVAD = PMT \times PVIFA_{i,n} \times (1+i)$$
