---

**Instructions:**

1. Answer all questions.
  2. Number of pages: 1 page
- 
- 

**Question 1**

*“Industrial policy design, organization and implementation capabilities are almost more important than sector selection in determining the success of an industrial policy.” Discuss*

**Question 2**

Why does competition policy matter for industrial development? Illustrate your answer by referring to the experience of specific countries.

**Question 3**

What are the key features of industrial clusters? Do you consider clusters to be an effective mechanism to support industrialisation? In your view, can policy-makers create industrial clusters when there is no pre-existing industry basis and if yes, how?

**(Each question carries equal marks)**
