## LAST ASSESSMENT OPPORTUNITY

21 November 2016
Time: $\mathbf{1 8 0}$ minutes writing time
Marks: 100
Assessors: Mr W Smith
Moderators: Mrs M McGill
External moderator: Mrs M Boshoff

```
INSTRUCTIONS:
- This question paper consists of }17\mathrm{ pages. Please ensure that you have all pages.
- You are allowed 180 minutes to answer this question paper.
- ALL answers must be written in the answer books provided. Answers or notes written on the question paper will not be submitted for marking.
- Silent, non-programmable calculators may be used, unless otherwise instructed.
- START EACH QUESTION ON A NEW PAGE
- HAND IN YOUR QUESTION PAPER
- HAND IN ALL ANSWER BOOKS.
- The answer books will NOT be marked if the question paper was not handed in.
- NO CANDIDATE IS PERMITTED TO LEAVE THE EXAMINATION HALL IN THE LAST FIFTEEN MINUTES OF THE ASSESSMENT OPPORTUNITY PERIOD.
```

## SECTION A

## [20 marks]

## QUESTION 1

## REQUIRED:

## Select the correct option and colour the block of the corresponding letter of the answer on the answer sheet provided.

## Question 1.1

A company has a total value of R2 million and its debt is valued at R600, 000. The before tax cost of debt is $12 \%$ and the cost of equity is calculated to be $15 \%$. Assuming a tax rate of $28 \%$, what is the weighted average cost of capital?
A. $14.1 \%$
B. $15 \%$
C. $13.1 \%$
D. $14.3 \%$

## Question 1.2

According to CAPM, companies with larger beta will have
A. High required returns.
B. Low expected returns
C. High weighted average cost of capital
D. None of the above.

## Question 1.3

What is the weighted average cost of capital of a South African company with the following information:

| D/E ratio | 3 |
| :--- | :--- |
| Ke | $14 \%$ |
| Kd | $8 \%$ |

A. $1.4 \%$
B. $10.5 \%$
C. $11.94 \%$
D. $12.5 \%$

## Question 1.4

For purposes of the calculation of WACC, when calculating the cost of convertible cumulative redeemable preference shares which are convertible at the option of the directors the following applies:
A. Assume that they will be converted to ordinary shares since ordinary shares are cheaper than preference shares.
B. First you must determine if the preference shares will be converted to ordinary shares by calculating the market value at the date of conversion.
C. Determine if they are traded on the exchange or not, as this will determine if they can be converted to ordinary shares.
D. None of the above.

## Question 1.5

Scribs Ltd is trying to decide whether to lease or buy some new equipment. The equipment costs R59 000 and has a 3 -year life. The equipment will be worthless after the 3 years and will have to be replaced. The company has a tax rate of $28 \%$, the cost of borrowed funds is $10 \%$ and equipment is depreciated on a straight line basis. Depreciation is equal to wear and tear. The equipment can be leased for R22 000 a year. What is the total incremental cash flow in year 1 ?
A. (R6 160)
B. (R15 840)
C. (R21 347)
D. (R22 000)
(2)

## Question 1.6

Cargo Ltd is trying to decide whether to lease or buy some new equipment. The equipment costs R100 000. The equipment will be worthless after 4 years and will have to be replaced. The equipment can be leased for 4 years, if the incremental cash flows for leasing amount to negative R34 000 and the first cash flows occurs in year 1:

The after tax interest rate that will result in the net advantage to leasing (NAL) being zero can be calculated as:
A. $13.54 \%$
B. $14.78 \%$
C. $25 \%$
D. Cannot be calculated

## Question 1.7

The incremental cash flows of leasing consider which of the following?
I. The cost of the asset
II. The lease payment amount
III. The applicable tax rate
IV. The annual depreciation expense
A. I and III
B. I, II and III
C. I, II, and IV
D. I, II, III, and IV

## Question 1.8

Scandal Itd has 10 million R1.00 ordinary shares in issue that have a current market value of R2.00 per share. The company also has non-redeemable loan capital in issue with a nominal value of R20 million that is quoted at R150 per R100 nominal value. The cost of ordinary shares is estimated at $15 \%$ and the rate of interest on the loan capital is $12 \%$. The rate of corporation tax is $25 \%$.

## What is the weighted average cost of capital for the company?

A $13.0 \%$
B $11.4 \%$
C $11 \cdot 0 \%$
D $13 \cdot 2 \%$.

## Question 1.9

Which ONE of the following methods of investment appraisal is consistent with the objective of shareholder wealth maximisation?

A Net present value
B Internal rate of return
C Accounting rate of return
D Payback period

## Question 1.10

Which of the following companies will be the best placed to adopt more debt into its capital structure, all other factors being equal?
A. A recently formed company that generates low cash-flows
B. An established retailer that generates most of its sales on credit
C. An established retailer that generates most of its sales for cash
D. An established retailer that has a history of volatile earnings

## Question 1.11

In the spot market, $\$ 1$ is currently equal to Aus $\$ 1.42$. The expected inflation rate is $3 \%$ in Australia and $2 \%$ in the USA. What is the expected exchange rate one year from now if relative purchasing power parity exists?
A. Aus $\$ 1.4058$
B. Aus 1.4062
C. Aus\$ 1.4286
D. Aus\$ 1.4342

## Question 1.12

The forward exchange rate $\qquad$ .
A. is the rate today for exchanging one currency for another for immediate delivery
B. is the rate today for exchanging one currency for another at a specific future date
C. is the rate today for exchanging one currency for another at a specific location on a specific future date
D. is the rate today for exchanging one currency for another at a specific location for immediate delivery

## Question 1.13

The spot exchange rate $\qquad$ .
A. is the rate today for exchanging one currency for another for immediate delivery
B. is the rate today for exchanging one currency for another at a specific future date
C. is the rate today for exchanging one currency for another at a specific location on a specific future date
D. is the rate today for exchanging one currency for another at a specific location for immediate delivery

## SECTION B

## [30 marks]

## QUESTION 2

(15 marks)
Browne Ltd., a luxury brands company based in Johannesburg, maintains a debt-equity ratio of 0.25 and follows a constant dividend/earnings policy with a $30 \%$ dividend pay-out rate.

The company has before tax profits of R2 685000 for the year and requires R1 700000 for new investments. The CFO of Browne Ltd. has informed you via email that a pool of funds will always be used to finance new investments, and that retained earnings is preferred above new share issues. The company tax rate is $28 \%$

## REQUIRED:

2.1 In your own words, briefly describe the main decision that dividend policies are concerned with.
2.2 Calculate the total amount that Browne Ltd. will pay out in dividends this year.
2.3 Calculate the retained earnings available for the investment after dividends have been paid.
2.4 Assume the retained earnings after dividend pay-out is equal to R1 300000 . Briefly discuss the dilemma that arises due to the 30\% dividend pay-out rate and identify three potential courses of action for Browne Ltd

## QUESTION 3

(10 marks)
The methods for calculating the Present Value and Future Value of money were established as far back as the 13th century, when Italian mathematician Leonardo Fibonacci published his influential work, the Liber Abaci. This gave rise to the Net Present Value method, which is a very important and widely used method in corporate finance today

## REQUIRED:

$$
\begin{aligned}
& \text { 3.1 Identify the four main assumptions of the NPV method, and briefly discuss whether } \\
& \text { each of them are valid in the real world. }
\end{aligned}
$$

### 3.2 Briefly explain the main reason why the NPV method is considered superior to the IRR method.

## QUESTION 4

(5 marks)
Orange Limited has R10 million that it keeps in cash in order to replace assets that are due for replacement in 6 months from today. This cash will not be needed until then, and currently earns $4 \%$ per annum in a bank account. A 6 month forward contract can be obtained at the bank for R10.20 per US Dollar (\$). Uncle Sam Bank, in the USA, offers an interest rate of 2\% per annum.

Current spot rates are:
1USD = R9.90

## REQUIRED:

4.1 Calculate the arbitrage profit that Orange Limited can realize by using the R10 million for 6 months.

## End of Section B

## SECTION C

## [50 marks]

## QUESTION 5

Outdoor World Limited is an outdoor and camping retailer. The company operates through a chain of outlets across South Africa. It listed on the JSE Limited in 2006 and has since maintained a healthy, steady dividend payout.

The last two years' financial information is as follows:

## Outdoor World Limited

| YEAR | 2011 | 2010 |
| :---: | :---: | :---: |
| Statement of Comprehensive Income (000's) | ZAR | ZAR |
| Turnover | 2869031 | 2201721 |
| Gross profit | 1391823 | 1058107 |
| Interest \& Finance Charges | 55911 | 25292 |
| Taxation | 208920 | 172888 |
| Profit after Interest \& Tax | 493991 | 355580 |
| Statement of Financial Position (000's) | ZAR | ZAR |
| Shareholders Interest (Equity) | 1560472 | 1066481 |
| Long Term Liabilities | 538308 | 268379 |
| Current Liabilities: | 401223 | 360730 |
| Accounts payable | 177287 | 326163 |
| SARS | 23480 | 34567 |
| Bank overdraft | 200456 | - |
| Fixed Assets | 1209804 | 531042 |
| Intangible Assets | 532781 | 441872 |
| Current Assets: | 757418 | 836742 |
| Bank \& cash | - | 534775 |
| Accounts receivable | 556429 | 180980 |
| Inventory | 200989 | 120987 |

## Additional information:

- During the year the company opened several new stores. Most of these were opened during the second half of the year. Turnover in all of these were in line with budgets, but the sales targets budgeted for the new stores were quite low, as management were mindful of the fact that the new stores will need time to find their feet and are only expected to run at full capacity in 12 to 18 months from opening.
- All the expansions were funded from retained earnings. This caused some cash flow challenges which management overcame by accessing the company's overdraft facility. The major investments during the expansions were in shop fitting and interiors, storage equipment and inventory.
- As a result of the cash flow pressures, the directors are considering not declaring a dividend and to rather appeal to the shareholders to accept that the expansion required a lot of cash and to rather look forward to larger dividends in the future.
- Suppliers allow 90 days credit to Outdoor World.
- Generally Outdoor World only sells for cash only, but in order to boost sales at the new outlets, customers are allowed to buy on 60 days credit terms for a limited period only. At some of the new outlets the implementation of the credit policy was careless, which resulted in some customers being extended credit without a thorough credit check being done.

## REQUIRED:

Prepare a report to the directors of Outdoor World Limited in which you calculate effectiveness/efficiency ratios and include practical suggestions on how to improve the effectiveness/efficiency. Your analysis should focus specifically on:

- Inventory
- Debtors
- Assets and
- Creditors.

## QUESTION 6

(25 marks)
Skydeck (Pty) Ltd is a fuel retailing company which buys petrol and diesel from oil companies and sells them to the public through various service stations located across Johannesburg. Skydeck (Pty) Ltd recently completed the construction of a new service station which straddles the N3 highway. The service station includes a convenience store and café and serves both north and south bound traffic on the highway. Motorists are able to access the service station through on and off ramps from the highway.

The board of directors of Skydeck (Pty) Ltd recently received a letter of intent from a leading oil company, PB Ltd, at the beginning of 2014. In the letter PB Ltd expresses its intention to purchase the new service station as a separate business entity from Skydeck (Pty) Ltd. The directors of Skydeck (Pty) Ltd are currently attempting to estimate how much such an operation could be sold for and have asked for your assistance.

You obtained the following information:

- The estimated sales volumes for the first year of operation is 41000000 litres of petrol and 10000000 litres of diesel.
- The current gross profit margin on petrol is 99c per litre, while the gross profit on diesel is 60c per litre.
- Cash flows are expected to grow at the following rea/ growth rates:
- 2015: 9\%;
- 2016: 14\%;
- 2017: 18\%;
- 2018: 11\%
- Lottery machines will be installed and operated on behalf of the National lottery who will pay Skydeck (Pty) Ltd a fixed rental of R1 000000 per annum. Lottery rental is not considered a core part of the service station's operations. The rental yield on lottery machines is $14 \%$.
- The Express shop and café sales amount to R1 per litre of petrol sold. Income from the express shop and café is considered a core part of the business.
- 30000 labour hours will be required to operate the service station in the first year and the labourers will be paid a wage of R300 per hour.
- Four supervisors and two managers will be required at R10 000 per month and R30 000 per month, respectively.
- Other expenses including electricity, telephone, royalties etc. are estimated at a total of R38 000000 per year.
- Skydeck (Pty) Ltd is entitled to a wear and tear allowance of R20 000000 per annum.
- Capital maintenance expenditure will amount to R15 million in 2014 and is expected to increase with inflation.
- The service station is not expected to hold an investment in working capital as all sales and purchases of fuel are for cash. The oil company supplying the fuel will deliver on a just-intime basis.
- Skydeck (Pty) Ltd's weighted average cost of capital is $25 \%$. Assume a tax rate of $28 \%$ and inflation of $6 \%$ per annum for the foreseeable future.
- Skydeck (Pty) Ltd incurred specific borrowing for the construction of the new service station. The current market value of the long term loan is R10 000000.

## REQUIRED:

Assist the board of directors of Skydeck (Pty) Ltd by calculating the value of the new service station straddling the N3 highway using the free-cash flow technique. Assume that the valuation is performed at the beginning of 2014.
