NOVEMBER EXAMINATION 2017

SUBJECT: OCCUPATIONAL HEALTH NURSING SCIENCE (GGB2057)

MODULE 5: EMERGENCY PREPAREDNESS

MODULE 6: CHRONIC AND COMMUNICABLE DISEASE MANAGEMENT

QUESTION 1

As the occupational health nurse practitioner (OHNP), you will be required to manage emergencies in the workplace.

- 1.1 The strategic management process in emergency and disaster management is divided into four fields, what are these processes? (2x½)=(2)
- 1.2 Briefly describe the planning phase in the emergency management cycle. (1x14)=(14)
- 1.3 Discuss the role and responsibilities of the OHNP in being prepared for an emergency? (1x6)=(6)
- 1.4 In an in-service training session with first aiders what advice would you give regarding their role of the first responder? (½x8)=(4)

***[26]**

QUESTION 2

SCENARIO

Mr. Jabu Mnisi has been brought into the clinic by his colleagues, he has been welding and has been complaining of painful, red, irritated eyes. Mr. Mnisi says it feels like gravel in his eyes. After you have examined Mr. Mnisi you realise this might be “Arc Eyes” or Keratitis.

- 2.1 How will you **treat and manage** Mr. Mnisi? (1x8)=*[8]

QUESTION 3

An OHNP working at a refinery (petrol) needs to be aware of the potential disastrous effects of an accident / incident on site to the employees, refinery property and surrounding community. Because of this the planning for a hazardous substance accident is essential.

- 3.1 How would you plan for the management of a potentially disastrous accident? (1x10)=(10)
3/...

NOVEMBER EXAMINATION 2017

SUBJECT: OCCUPATIONAL HEALTH NURSING SCIENCE (GGB2057)

MODULE 5: EMERGENCY PREPAREDNESS

MODULE 6: CHRONIC AND COMMUNICABLE DISEASE MANAGEMENT

- 3.2 Explain how you would identify multiple injured employees and what each identification means when triaging in the occupational health setting. (2x4)=(8)
- 3.3 In many industrial settings (foundries, kitchens, mining environments, furnaces) exposure to thermal stress is common. As an occupational health nurse practitioner (OHNP), you need to recognize the signs and symptoms and treat the various conditions related to thermal stress.
- 3.3.1 Name 4 conditions commonly requiring treatment because of exposure to thermal stress in the occupational health setting. (½x4)=(2)
- 3.3.2 Discuss how you identify each of the conditions listed in 3.3.1. (1x7)=(7)
- 3.3.3 What first aid treatment would you provide at the occupational health clinic prior to referring to hospital **for each condition?** (2x8)=(8)
- *[35]**

QUESTION 4

Vulnerable, specific and special need workers are all categories that need special attention in the occupational setting. Employees working in risk areas and vulnerable groups need special insight into their health situation and support from the OHNP.

- 4.1 Discuss the elements that would affect the health promotion program of women in the workplace. Ensure you cover risks, risk management, legal considerations and the role of the OHNP? (1x2)=*[25]

QUESTION 5

Occupational health assessment of executives is aimed at examining and screening for health factors that may impact negatively on their health and aims care to introduce appropriate intervention to reduce the risk to health.

- 5.1 What would you implement as part of the executive health program at your factory? (1x6)=*[6]
