My family

My name is Jabulani. My family is big. I have six brothers and one sister. I am the third eldest at home. I have two brothers who are older than me. My sister is the last born. We are many without mother and father. We are not lucky because our house does not have many rooms.

My father says that I look like him, but there are some of my brothers who look like mother. My sister is just like mother even if she is still young. She is still at school, doing the last grade. There are four of the children still at school in our family. We who are grown up already work or are still studying higher education at college or at university. Mom and dad are retired, they stay at home and rest.

Some of my brothers are already married, even if they are younger than me. Mom and dad have many grandchildren. There are girls and boys. During the school holidays they come and visit at our place, then there is noise all day long even if a person wants to work.

As for me, I want to complete my studies before getting married. I do not want to have children now, because these children at our place are bothersome. I do not know how I am going to teach if I am so disturbed at home!

Nevertheless, I love my family. All of us are happy when we meet during holidays or on weekends. We relax at home, cooking and eating well/nicely.
