

FACULTY/COLLEGE	College of Business and Economics
SCHOOL	School of Accountancy
DEPARTMENT	Accountancy
CAMPUS(ES)	APK
MODULE NAME	Practical Applications in Taxation or Internal
	Auditing
MODULE CODE	PAT8X00, PAI8X00, RMA8X00
SEMESTER	First
ASSESSMENT OPPORTUNITY,	Final Assessment opportunity
MONTH AND YEAR	May 2019

ASSESSMENT DATE	27 May 2019	08:30 – 12:03	
ASSESSOR(S)	Mrs Rozanne Smith		
MODERATOR(S)	Dr Marina Bornman (Internal Assessors) Mrs Izette Nel (External moderator)		
DURATION	3 Hours and 33 minutes [25 minutes reading time and 188 minutes writing time]	125 marks	
NUMBER OF PAGES OF QUESTION PAPER (Including cover page)			5

INFORMATION/INSTRUCTIONS:

- This is a closed-book assessment, but students are allowed to use their orange referencing booklets in the assessment.
- This paper consists of 5 pages and 47 pages of sources to reference.
- There are 2 questions.
- You have 25 minutes reading time. During this time you are allowed to read and make notes on the question paper (scenario). You are not allowed to write anything on your answering sheet. You will only receive the required section of the paper once the reading time is finished.
- Answer each question on a separate page.
- Delete all open pages on your answer sheet with a pen. Pages on your answer sheets that contain open spaces will be marked as such and those pages will not be eligible for a remark.
- No tippex or pencil may be used on your answer sheets. Pages on your answer sheets that contain pencil or tippex will be marked as such and those pages will not be eligible for a remark.
- Read the questions carefully and answer only what is required.
- Number your answers clearly and correctly as per the question paper.
- Write neatly and legibly on both sides of the paper in the answer book, starting on the first page.
- All the examination regulations of UJ and the policy document for students of the Department of Accountancy will apply before, during and after this test.

Question 1 (60 Marks)

A group of Masters' students are busy with a research project as part of their course work for their degree. They are conducting research on the work readiness of students who finish a post graduate qualification and who immediately enter the professional working environment. They identified the accounting profession as their sample group. They obtained personal information on post graduate students from a lecturer. They then identified every second person on the list and contacted them to find out where they are employed at. The researchers also obtained their sample's academic records in order to compare their academic performance to their work ethic. The researchers contacted the employers to obtain the email addresses of the HR staff within the organisation. Below is an example of an email that the researchers sent out to the employers:

To: Employers@pgdastudents.co.za

From: MComresearchers@university.co.za

Subject: Questionnaire to be completed for M Com research project

To whom it may concern

We have identified one of your employees as part of our sample for our research project. Ms Evelyn Mdaka was a student at our university, and is currently employed as a trainee accountant at your firm. Our research study attempts to determine the work readiness of students who complete a post graduate qualification from our institution. Will you please complete the following questionnaire about Ms Mdaka:

Employee number:
ID number:
Monthly salary and other benefits:
Evelyn's work ethic:
Evelyn's competence in the area of accounting and taxation:
Evelyn's most recent performance rating:
Any areas of improvement identified for Evelyn:
Any additional preparation that you think the university should do to prepare students for
the professional working environment:

Thank you for your participation.

Regards

M Com Research team

Please do not hesitate to contact us for more information on 082-826-8271

One of the employers (Sarah) decided to contact the researchers to obtain more information on the study. She spoke to the head researcher, Ben, who then provided her with more information on the questions she had. Below is a scribe of the conversation they had:

Sarah	Good morning, can I please speak to someone who can assist me with detailed		
	information on the research project being conducted.		
Ben	Good morning. I am the head researcher and can answer any questions you		
	have.		
Sarah	Great! First of all I would like to know whether the people you identified as your		
	sample volunteered and gave consent to you to use their information.		
Ben	I am sure they did. I got their details form someone who used to lecture them,		
	and I am sure the lecturer has the right to share the information.		
Sarah	Have you obtained ethical clearance from your university on this study?		

in your findings? Or will the information be kept confidential? Ben We will have to publish the names, surnames, employee numbers and all off information requested in the questionnaire, otherwise our study will not complete. Sarah What referencing style would you use? Ben As this is primary data we will not have any referencing in our project. Show we use secondary data we will include the name of the author next to the paragraph. Sarah Are you aware of the fact that for a research project to be successful it show have certain characteristics? Ben Of course we are — we are Masters students. We know that research show always be only rigorous and valid. Sarah What mode of enquiry will you be using in your study? Ben Mode of what?? I don't understand your question. Sarah Never mind! Have you already started with your literature review, seeing the you are already busy with the empirical study? Ben No, we will do a literature review later, if it is necessary. Sarah It seems like you have a clear research question. Do you think a good resear question is important? Ben Not really, you can ask anything you like. Even if it is vague, then you can juexplain it to someone if they don't understand. Sarah What research design will you be using? Ben We will use a longitudinal design. Sarah Oh, okay. So we can expect a questionnaire like this again in years to come? Ben No way! When I am done with this project I don't want to do research again. Sarah Do you expect any errors in this research project, to be realistic you know? Ben Absolutely not. There is no such thing as an error in research. It's my study a I decide what I want to do. Sarah Why did you decide to use questionnaires? Ben It's so easy, and there are no rules that you need to follow when designing the questions. You can ask whatever you want. Sarah Thank you Ben. I think I have all the information I need. Should we decide partake in the study I will get back to you. You better partake! We took the time to identify Evelyn as a respondent and	Ben	No, according to us this is a low risk study and we do not need any ethical clearance.		
information requested in the questionnaire, otherwise our study will not complete. Sarah What referencing style would you use? Ben As this is primary data we will not have any referencing in our project. Shot we use secondary data we will include the name of the author next to the paragraph. Sarah Are you aware of the fact that for a research project to be successful it shot have certain characteristics? Ben Of course we are — we are Masters students. Ben Bye.				

You are required to:

a) Identify the weaknesses in the above mentioned research project. For each weakness, explain the weakness, and if possible provide an appropriate action that should be taken by the researcher. (45)

Your answer should be in table format as stated below:

Weaknesses from the scenario. (15 marks)	Explanation based on theory and possible appropriate action of improvement. (30 marks)	
E.g. There is the possibility of plagiarism as Ben indicated he will not reference everything.	Plagiarism is a serious offence (Explanation). Ben should reference all sources he uses (improvement action).	
	*NOTE: The explanation could sometime be longer (more than only 1 or 2 marks).	

- b) Who was their population, and what sample selection method was used to select their sample. (3)
- c) Why is it important to do a literature review, and what are the steps in conducting a literature review? (7)
- d) The researchers decided to use questionnaires. What other method of data collection could they have used apart from questionnaires and observations? Also describe any two types of this data collection method.

Question 2 (65 Marks)

You are required to do the following for each of the 15 sources attached:

a.	Identify the type of source;	(15)
I.	Describe the factorist and according the Hemiseut et de-	/A =\

b. Provide the in-text reference using the Harvard style;c. Compile a reference list for all the sources using the Harvard style. (30)

Please provide your answer in the following table format:

Number of source	Type of source	In-text reference	Reference list
Hullibel of Soulce	i ypc oi souloc	III LOAL I GIGI GIIGG	INCICION NO

Layout (2)

Precision and interpretation marks (3)
