|  | ONLY ONE POCKET CALCULATOR PER CANDIDATE |
|  | MAY BE USED. |
| REQUIREMENTS | $:$ NONE |

## INSTRUCTIONS TO STUDENTS

## PLEASE ANSWER ALL QUESTIONS.

## QUESTION 1

1.1 Design reports usually focus on and/or include number of items. Name 3 of those items
1.2 The instructions to tenderers vary from one project to another; give six typical examples of instructions usually given to tenderers.
1.3 Describe the purpose of a Tender Document Check List

## QUESTION 2

2.1 Explain what the agenda of the "Kick-off" meeting typically includes.
2.2 Describe other arrangements to be made at the commencement of the work.
2.3 Why is work being given out to other parties (subcontractors)? Give 4 reasons
2.4 Measurement procedure number of general arrangements and actions: Name four (4)
2.5 The final step of the whole construction process is the writing of a closeout or completion report. What are the four aspects need to be addressed?
2.6 Disputes that are taken to court (litigation) become very costly for all parties involved. Describe the process of litigation.

## QUESTION 3

You are required to determine the operating and owning cost per hour of an Earthworks Machine. It needs to be done over the lifetime of the machine, by applying the information provided below.
A plant Hire Company needs to buy a Grader

- This machine will be used on various contracts.
- These operations will be 5 days per week and 9.5 hours per day for the machine (No weekend work)
- These operations continue throughout the year with no time breaks.
- Do not allow for any annual leave in the calculations.
- The machine will be utilized as follows:
- Working time of the machine as per the working schedule of the operator.
- General information on the Grader is listed below, in table format.
- The repayment period of the Grader will be 60 months.
- The applicable interest rate will be $14 \%$ pa. (See tables provided to determine the repayment)
- Insurance will be $7.5 \%$ of the "Purchase Price" per year.
- The anticipated economical lifetime of the machine is estimated at 13000 h (Hours).
- The residual value of the machine after 5 (five) years will be $0 \%$ (No residual value).
- The fuel price is R 13.46 per litre.
- The operator: (Applies only to the operator and not the machine)
- Rate per hour (Normal time) R 66.00 per hour. Rate per hour (Over time) R 80.00 per hour
- Max. normal hours per week 45 (Basic Conditions of Employment Act)
- Maximum allowable overtime (OT) per week is 10 hours per week. (B C E Act)
- No time will be deducted for a lunch break of the Operator
- The lunch break will be regarded as "working hours" included in the daily hours.
- Ignore any VAT aspect in this calculation.

Note: All prices reflected in the table below is $\mathrm{R} / 1000$

|  | Description | Price | Occurrence | Notes |
| :---: | :--- | :--- | :--- | :--- |
| 1 | Grader H140 CAT | R 2400 | Only once | Price when machine was <br> purchased |
| 2 | Tyres | R 21 each | Every 4000 hours | This machine has 6 six tyres |
| 3 | Preventative Maintenance | R 6 per event | Every 750 hours |  |
| 4 | GET | R 8 per event | Every 2500 hours |  |
| 5 | Fuel consumption (Item 12) | See above | 27.5 litres/ hour | As stated above Fuel price |
| 6 | Unscheduled maintenance | N/A | $15 \%$ of machine value over <br> lifetime |  |
| 7 | Major Components Replace <br> Final Drive | R 95 per event | Every 10 000 hours | N/A |
| 8 | Major Components Replace <br> Engine | N/A | $21 \%$ of machine value over <br> lifetime |  |

## QUESTION 4

You need to calculate the Contract Price Adjustment Factor for the Payment Certificate of this upcoming certificate: In this instance end February 2019, Johannesburg project. You have the following information available in the Table 4.1 below:

Table 4.1: Accumulative figures of progress in previous months.

| DATE | LABOR | PLANT | MATERIAL | FUEL | SUB CONT. | PROFIT | TOTAL |  |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | Accumulative Values |  |  |  |  |  |  |  |
| $2018-05-31$ | 300 | 900 | 400 | 400 | 200 | 200 | 2400 |  |
| $2018-06-30$ | 1100 | 1700 | 600 | 500 | 200 | 400 | 4500 |  |
| $2018-07-31$ | 1400 | 1800 | 1400 | 800 | 400 | 600 | 6400 |  |
| $2018-08-31$ | 1700 | 2300 | 2300 | 1000 | 500 | 800 | 8600 |  |
| $2018-09-30$ | 2300 | 2400 | 3300 | 1000 | 600 | 1000 | 10600 |  |
| $2018-10-31$ | 3500 | 2700 | 4100 | 1300 | 700 | 1200 | 13500 |  |
| $2018-11-30$ | 3900 | 3400 | 4800 | 1500 | 700 | 1400 | 15700 |  |
| $2018-12-31$ | 5200 | 3400 | 4900 | 1700 | 800 | 1600 | 17600 |  |
| $2019-01-31$ | 6400 | 3400 | 5700 | 1800 | 1000 | 1800 | 20100 |  |
| $2019-02-28$ | 7800 | 4200 | 6300 | 2000 | 1300 | 2000 | 23600 |  |
|  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

## Additional information available:

- The Sub Contractor only supplies plant, with no labour.
- The Base Index for this calculation is the month preceding (before) the first payment.(On the above table)
- The portion of the contract not applicable to the price adjustment is $15 \%$.
- The values for the coefficient ( $\mathrm{a}, \mathrm{b}, \mathrm{c}$, and d ) to represent the proportionate values of Labour, Plant, Material and Fuel must be used as follows $a=0.25, b=0.4, c=0.2$, and $\mathrm{d}=0.15$
- The payment is for the month of February 2019. (2019/02/28)
- A schedule of these indices is included for your convenience. (Courtesy of SAFCEC)
- The general conditions use in this agreement, between the company you work for and the client, is the "General Conditions of Contract for Construction works" (GCC) $2^{\text {nd }}$ Edition (2015). Copies of the relevant pages are included for you convenience. (Courtesy of South African Institution of Civil Engineering)

You are required to provide the following:
5.1 Determine the factor to be applied by deciding on the indices and do the calculation. Marks

Determine the total value to be claimed from the Client, with the information available, at the end of February 2019.

## QUESTION 5

Draw up a cash-flow projection indicating the cash requirements to be provided by a contractor who plans to undertake a contract valued at R100 000 and which is estimated to have a duration of 12 months. The cash requirements are to be based on a forecast profit of $20 \%$. Retention money of $10 \%$ is to be taken from each payment certificate until the amount held is $5 \%$ of the contract amount. Retention will be reduced to $2,5 \%$ at contract completion. The defects liability period is 6 months, at the end of which the remaining retention will be paid to the contractor.

| Cash-flow Projection |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Month | Cumulative <br> Budget | Monthly <br> Budget | Monthly <br> costs | Retention | Monthly <br> income | Monthly <br> cash flow | Cum. <br> cash flow |
| 0 | 0 |  |  |  |  |  |  |
| 1 | 3000 |  |  |  |  |  |  |
| 2 | 7200 |  |  |  |  |  |  |
| 3 | 14300 |  |  |  |  |  |  |
| 4 | 25000 |  |  |  |  |  |  |
| 5 | 37500 |  |  |  |  |  |  |
| 6 | 50000 |  |  |  |  |  |  |
| 7 | 62500 |  |  |  |  |  |  |
| 8 | 75000 |  |  |  |  |  |  |
| 9 | 85700 |  |  |  |  |  |  |

| 10 | 92800 |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 11 | 97000 |  |  |  |  |  |  |
| 12 | 100000 |  |  |  |  |  |  |
| 13 |  |  |  |  |  |  |  |
| 18 |  |  |  |  |  |  |  |
| Totals |  |  |  |  |  |  |  |
