All the questions that follow are based on the following set of facts. Read the set of facts and then answer the questions that follow:

There is an informal settlement just outside Alberton, called Fair Fields, where the community has been living in dire conditions for more than 20 years. They have no running water or electricity. The roads are not tarred and the inhabitants only live in shacks and huts that they have built themselves. Fires, rain, wind and drought also have a severe effect on the community members and their children. The local government of Alberton have promised the community that the area will be developed and that they qualify for government subsidised housing. The community members have completed the necessary documents and applied for such housing. They have also been informed that their applications were approved, but still nothing has been done. In desperation the community sought legal advice and a civil rights group called "Housing for All" have agreed to help the community institute a class action against the Alberton municipality for the infringement of their rights to dignity and access to adequate housing. The municipality argues that there is insufficient funds to develop the settlement of Fair Fields and that they have taken a decision to move the entire community to another settlement, called Sonstraal, situated on the other side of Alberton. The municipality further argues that these funds are needed elsewhere in the municipal budget especially with regard to health care. Suppose the case has been instituted in the South Gauteng High Court.
