QUESTION 1:

The questions that follow are based on the following set of facts. Read the set of facts and then answer the questions that follow:

There is an informal settlement just outside Bloemfontein where the community has been living in dire conditions for more than 10 years. The community decided to expand their informal settlement to a piece of vacant land next to their existing settlement which belonged to the state. The community has no running water or electricity. The roads are not tarred and the inhabitants only live in shacks and huts that they have built themselves. Fires, rain, wind and drought also have a severe effect on the community members and their children. The local government of Bloemfontein has promised the community that their area will be developed and that they qualify for government subsidised housing, but has threatened to forcibly remove the community from the neighbouring land since they have been occupying the property illegally. In desperation the community sought legal advice and a civil rights group called "Housing for All" have agreed to help the community institute a class action against the Bloemfontein municipality for the infringement of their rights to dignity and access to adequate housing. The municipality argues that there is insufficient funds to develop the settlement and that the community will be forcibly removed from the land that they are illegally occupying. The municipality further argues that funds are needed elsewhere in the municipal budget especially with regard to health care. Suppose the case has been instituted in the High Court.

(PLEASE NOTE: **You must name and explain the factors and physically apply them to these facts.**) (10)
